

Have your say about dental services in Croydon

Tell us through this short survey

This survey is all about your experience of using Croydon dentists since 6 October 2020, when NHS England and NHS Improvement London Region expected all dental practices to be reopened for face-to-face treatments.

We want to understand how the experience of the service has been for you since this time. We are working in partnership with the Croydon Local Dental Committee, who represent Croydon dentists, on this project and will share our analysis with them. Your feedback in this project will be anonymised.

Fill in the survey and tell us your experiences today via:
