Acorn Wellbeing

is a geodemographic segmentation of the UK's population specifically designed with health and wellbeing issues in mind. Acorn Wellbeing segments the population into 4 groups (Health Challenges, At Risk, Caution and Healthy)

Nearly 40% of all households in Croydon are classified as "Healthy", but there is not one "Healthy" postcode classification in either New Addington North or South.

In New Addington North 89% are either "Health Challenges" or "At Risk".

% of households by ACORN Wellbeing type - 2019

■ Health Challenges
 ■ At Risk
 ■ Caution
 ■ Healthy

North West

Total Number	386 households are classified as “Health Challenges”. This is the least healthy type. (Lowest out of 6 localities)
Rate	1.9% of the locality are classified as “Health Challenges” (Lowest out of 6 localities)
High Density Areas	- Higher proportion of at risk and health challenges in Norbury and Pollards Hill ward

Central West

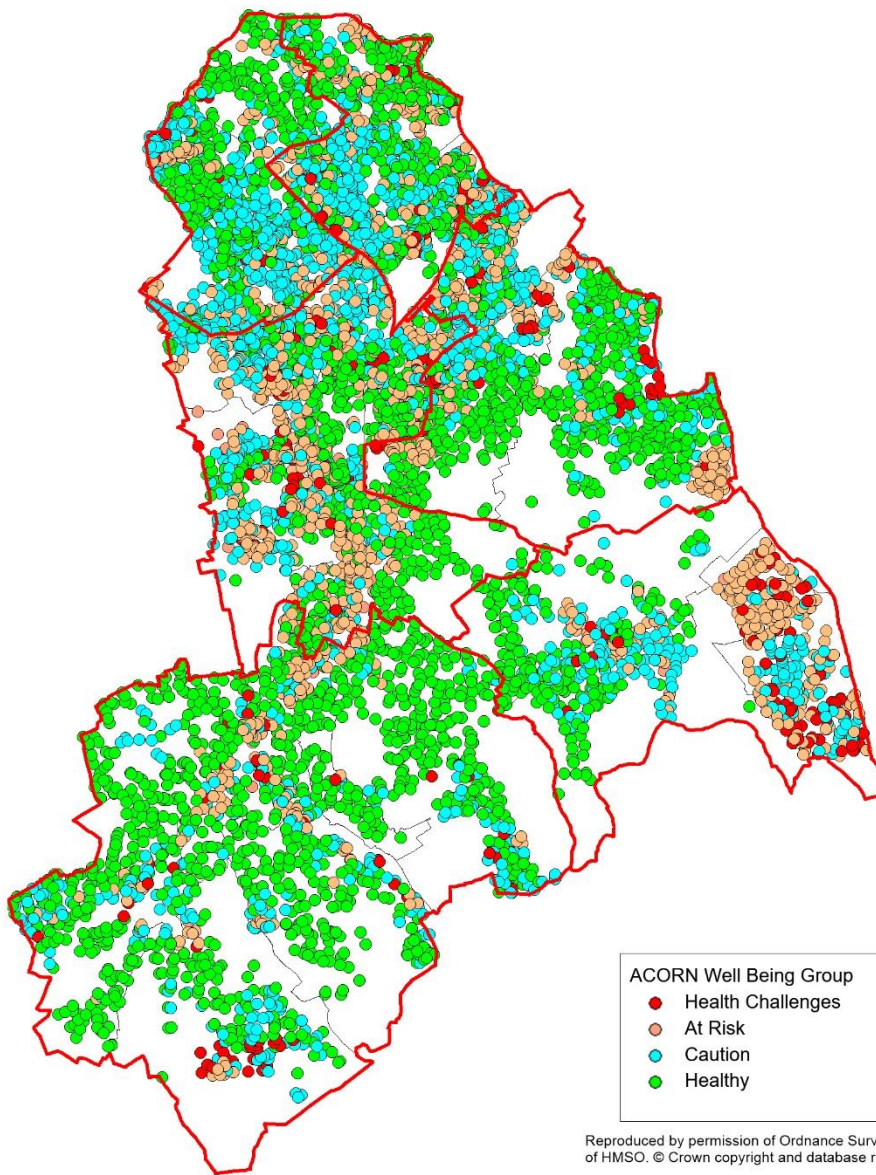

Total Number	1,847 households are classified as “Health Challenges”. This is the least healthy type. (2nd highest out of 6 localities)
Rate	4.6% of the locality are classified as “Health Challenges” (3rd lowest out of 6 localities)
High Density Areas	- Highest number of health challenges in Waddon ward

South West

Total Number	1,367 households are classified as “Health Challenges”. This is the least healthy type. (3rd highest out of 6 localities)
Rate	4.7% of the locality are classified as “Health Challenges” (3rd highest out of 6 localities)
High Density Areas	- Highest number of health challenges in the south of the Old Coulsdon ward
